

# FERRASECURE™

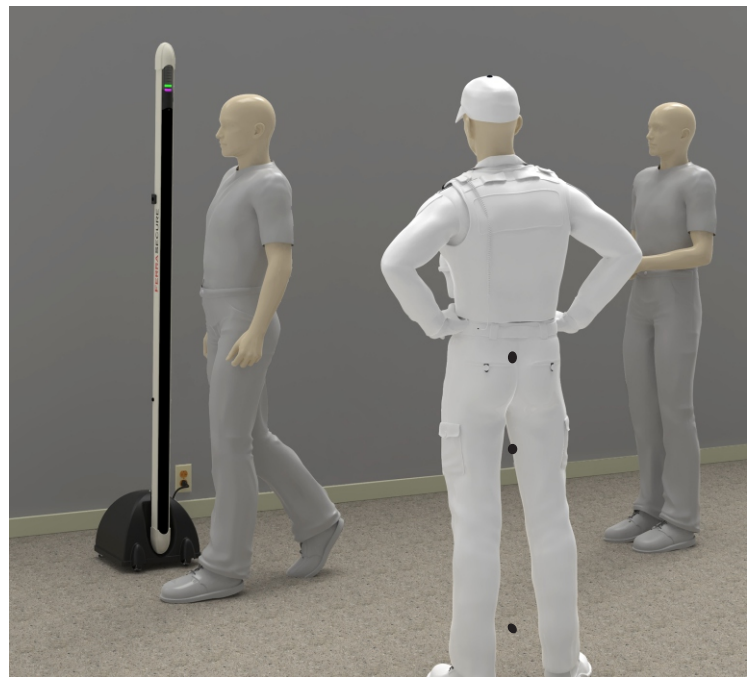

## FOCUS

## Reduce violence in healthcare with non-invasive screening

**KOPP** → *Development Inc.*

The leading manufacturer of Ferromagnetic Detectors for MRI safety with 1000s of detectors installed worldwide introduces FerraSecure for Healthcare.

Detects instruments of violence such as knives, guns, maces, box cutters, razor blades, scissors

- **Full body threat screening** both inside and outside the body without divestiture, accomplished in less than 2 seconds
- **Directional Screening** – Can be set to detect threats entering a designated area but ignore previously scanned threats exiting the designated area. For example, a doctor allowed into Emergency Department would not trigger an additional alarm when leaving Emergency Department
- Very **affordable** Cost
- Accurately pinpoints the **location** of the threat
- **Safe** for all personnel, even with medical implants or pregnant

# FERRASECURE™

# FOCUS

## FEATURES:

- **Ready for operation in 30 seconds**
- **High speed screening capabilities** allow up to 60 people to be screened per minute
- **5 proprietary sensors** offer uniform sensitivity
- **Based on the patented FerrAlert® MRI detection technology**
- **24 hour battery capability**
- **No dangerous lithium batteries**
- **Wheels and handle** for easy mobility
- **No installation required**
- **Self test** no periodic calibration or maintenance
- **Applicable to a wide variety of venues** with optional accessories and deployments

## DEPLOYMENT AND ACCESSORY OPTIONS:

### DUAL PASS THROUGH OPTION

- Allows for a wider entrance
- includes all the features above

### WALL MOUNT OPTION

- Quickly attaches with just 2 mounting brackets
- Low profile, protrudes only 3.75 inches (9.53 cm) from the wall
- May be concealed in a wall
